DOE Selects Eleven Contractors for Multiple-Award Cleanup Contracts

Cincinnati -- The Department of Energy (DOE) awarded eleven contracts today that will support environmental cleanup services by the Office of Environmental Management. These Nationwide Multiple-Award Indefinite Delivery/Indefinite Quantity (ID/IQ) contracts have an estimated maximum total value of \$907 million over five years.

The following awardees are selected:

- AECOM Technical Services, Inc., Englewood, Colorado
- Bechtel National, Inc., Frederick, Maryland
- CDM, a Joint Venture, Chantilly, Virginia
- CH2M Hill Constructors, Inc., Englewood, Colorado
- EnergySolutions Federal Services, Inc., Oak Ridge, Tennessee
- Fluor Federal Services, Inc., Greenville, South Carolina
- Jacobs Engineering Group, Inc., Oak Ridge, Tennessee
- MACTEC Engineering and Consulting, Inc., Alpharetta, Georgia
- Science Applications International Corp., Oak Ridge, Tennessee
- Shaw Environmental & Infrastructure, Inc., Denver, Colorado
- Washington Group International, Inc. (a Division of URS), Aiken, South Carolina

The goal of the multiple-award contracts is to establish contract vehicles that DOE sites can use to place timely, competitive and cost-effective task orders for environmental restoration, waste management, and facility deactivation, decommissioning, decontamination, and demolition services.

The Nationwide ID/IQ solicitation was unrestricted and open to all companies, regardless of size. On September 17, 2010, DOE awarded eleven Nationwide Multiple Award ID/IQ contracts under a solicitation set aside for small businesses for cleanup services that are smaller in scope and cover less hazardous cleanup tasks.

DOE's overall estimate for cleanup services that can be ordered under both sets of Multiple Award ID/IQ contracts is \$1.8 billion.

The mission of the Environmental Management program is the environmental remediation of DOE sites throughout the nation. Central to this commitment is the remediation of contaminated sites from nuclear weapons research and production and the disposal of the resulting radioactive and hazardous wastes.

Additional information on the ID/IQ acquisition can be found at:
